

In the Claims:

Please cancel claims 7-20, without prejudice.

1. (Original) A liquid crystal display device comprising: two substrates; a liquid crystal layer into which liquid crystal is inserted between opposing surfaces of the two substrates; and a structure provided so as to partition the liquid crystal layer and forming at least one enclosed domain in each display pixel, wherein the alignment of the liquid crystal molecules while a voltage is being applied is symmetric with respect to a plane parallel to the substrates and almost passing through the center in the direction of the thickness of the liquid crystal layer.

2. (Original) A liquid crystal display device, as set forth in claim 1, wherein the liquid crystal molecules have negative dielectric constant anisotropy and are almost vertically aligned with respect to the substrate surface while no voltage is applied.

3. (Original) A liquid crystal display device, as set forth in claim 1, wherein the tilting orientation of the liquid crystal molecules has two or more directions in each domain when projected on the substrate.

4. (Original) A liquid crystal display device, as set forth in claim 1, wherein the two substrates comprise electrodes on the opposing surfaces thereof, and wherein the structure is provided on the electrode and is made of dielectric material.

5. (Original) A liquid crystal display device, as set forth in claim 1, wherein the structure has a grid-like shape.

6. (Original) A liquid crystal display device, as set forth in claim 1, further comprising: first and second polarizing elements provided on the sides of the two substrates, respectively, the sides being not opposed to each other but facing in the opposite directions, and whose axes of absorption are orthogonal to each other; and at least one phase difference film provided at least either between the first polarizing element and the substrate to which the first polarizing element faces or between the second polarizing element and the other substrate, to which the second polarizing element faces.

7-20. (Cancelled)
